

LOW EMISSION ZONE (LEZ)

From November 30, 2025, the center of Malaga will be a Low Emission Zone (LEZ), which means that access by car will be regulated according to the type of vehicle.

Can your car drive in the center?

It depends on the DGT environmental label:

- Zero, ECO, or C label → you can enter without any problems.
- B label → you can enter for now, but from November 30, 2026, driving will be prohibited.
- No label → you are not allowed to drive or park in the city center area.

If you don't know what label your car has, you can check here, as well as get more information.

Which vehicles can enter the LEZ (Low Emission Zone)?

Free access:

- Cars and motorcycles with **ZERO, ECO, C or B** labels
- Vans with **ZERO, ECO, C or B** labels
- Public transport (buses), taxis and VTC
- Historic vehicles and trucks

Special cases (with prior notice):

- Emergency and healthcare vehicles
- Police and security services
- Municipal services
- Vehicles for special assistance

Vehicles **without an environmental label** may have restrictions depending on the year and local registration.

What should you do if you cannot enter?

In that case, you can leave your car in a parking lot outside the city center and come to the hotel by taxi or public transportation. If you need help, please do not hesitate to write to us and we will give you options.

WELL & COME
